

bisque comes from china. here's why...

WHERE BISQUE IS BORN

The piece of bisque you're holding in your hands has made a long and exciting journey in order to reach you. Each piece of our pottery is hand sculpted and created at our newly constructed, woman owned and operated facility in southeast China. By combining state of the art techniques with the artisan heritage of the region, we're able to bring you quality pieces with a personal touch. This is just one of the reasons why we proudly partner with our team of expert craftsmen to bring you the pottery you love to paint.

HOW BISQUE IS BORN

Over 20,000 years ago, the Chinese invented ceramics, and they have been fine-tuning the process ever since.

STEP ONE: Create master mold from sculpted design

STEP TWO: Create multiples of the master mold

STEP THREE: Mix and pump the clay slip for bisque

STEP FOUR: Fill molds & presses with clay slip

STEP FIVE: Transport greenware for drying racks

STEP SIX: Clean and assemble greenware

STEP SEVEN: Unload fired bisque from the kiln

STEP EIGHT: Prepare bisque for final inspection

STEP NINE: Inspect & pack each bisque piece

STEP TEN: Unload container in U.S. & inspect bisque shapes

STEP ELEVEN: The bisque is ready to be painted by you!
