

Tips & Techniques

- For full coverage, apply 3 to 4 coats, letting dry between coats.
- These underglazes paint on like **acrylics**.
- Cover-Coat can be applied to greenware and fired to cone 04 for permanent adherence.
- For optional clear glaze application, brush-on or dip clear glaze over Cover-Coat.
- Cover-Coat colors may be **tinted** using E-Z Strokes™ or other Cover-Coat colors to create unique custom hues.
- Cover-Coat Underglazes are perfect for airbrushing and brushwork.
- Great for layering because they dry **quickly** and can be painted over without lifting the colors underneath.
