

Helpful Suggestions for Stiling Ornaments

For ornaments with a metal cap such as **#2052**, we suggest using stilt **#8962**, the 5.75" Tall Stilt. While this stilt is technically designed for heavy pieces that need inner support, it also works great for open-top ornaments!

For ornaments with a small hole in the top such as **#2057**, we suggest using stilt **#SHSR800**, Roselli Sm Trident Stilt w/ Rods. We call this our "small but mighty" stilts because the rods hold the weight of the ornaments so well!

For ornaments with a metal right at the top like **#2054**, we suggest using stilt **#DF106 or #DF108**, the DuraFire Kiln Post, and placing a thick metal rod across the top for hanging.
